NOT TO BOAST...BUT SO THAT YOU MAY KNOW OF OUR.....

Facilities for Serving You!...

From the tip of the architecturally designed stacks to the shipping platform and railroad siding on the main line of the Pennsylvania Railroad this group of factory buildings is equipped to give you the utmost prompt and efficient service.

Modern machinery punctures the bubble of high cost of production. It also produces finished ware that places "run-of-kiln" on a par with the usual carefully selected "firsts". Thus, this double control of costs means that what is considered impossible quality for the money is quite possible here.

But modernization with us does not stop with factory buildings and equipment. It is the heart and soul of the personnel itself. Skilled artisans who anticipate the latest trends are constantly producing designs which are distinctly Porcelier in individuality. Merchandising experts are continually working out new and better selling ideas, to help you sell in volume. Packing and packaging authorities are forever improving upon this necessarily important part of our service to help simplify your stock control and have every shipment land in your warehouse in perfect condition.

And so—won't you believe us, in telling of these features of our service when we humbly say, that all of these facilities have been made available in an honest effort to serve you and to make your dealings here outstanding in profit possibilities and a pleasure to you as well.
